

OBJECTIVE

Aspiring software developer with proficiency in Python, C, Java, and SQL. Experienced in implementing data structures and algorithms, debugging applications, and building scalable software with database integration.

EXPERIENCE

AI Intern – Rubixe AI a brand of THINK AHEAD INNOVATIONS PVT. LTD. | 4 Months

Jan 2026 – Present

- Engineered an AI-powered application using Flutter and Django, trained on 1K+ data points with 96–97.5% accuracy; deployed via Docker and AWS, supporting 1K+ users and 10+ API integrations, reducing latency by 30%.
- Designed a Django Team Creation System achieving 99.5% accuracy, cutting manual effort by 40%, supporting 100+ users and processing 500+ allocations.
- Developing a Placement Platform using Django with 15+ features, built to handle 500+ users, focusing on scalability and efficient workflow automation.

EDUCATION

- Bachelor of Engineering (B.E.) in Artificial Intelligence & Machine Learning
- Sri Krishna Institute of Technology, Bengaluru — Expected 2026
- CGPA: 7.97 / 10
- Class 12 (CBSE) – Kendriya Vidyalaya MEG & Centre, Bengaluru — 2022 — 65.4%
- Class 10 (CBSE) – Army Public School, PRTC, Bengaluru — 2020 — 76.16%

TECHNICAL SKILLS

Python, SQL, R, C++, Java | Machine Learning & Deep Learning (Scikit-learn, TensorFlow, PyTorch, Keras, XGBoost; CNN, RNN, LSTM, Transformers) | Data Analysis & Visualization (Pandas, NumPy, Matplotlib, Seaborn, OpenCV, .NET Tableau, Power BI, Excel) | Databases (MySQL, MongoDB, PostgreSQL) | Cloud & Deployment (AWS, GCP, Azure; Flask, FastAPI, Streamlit) | Version Control (Git, GitHub, GitLab) | Core Skills: Data Preprocessing, Feature Engineering, Model Optimization & Evaluation, Predictive Analytics, API Integration, MLOps

PROJECTS

Emotion Based Music Recommendation System:

Aug 2023 - Dec 2023

- Enhanced a real-time emotion interpreter using a **32,000-image dataset** and a **7-class CNN** running at **25–30 FPS**. Integrated it with a **500+ track library** across **7 genres** to deliver **emotion-based music suggestions** within **1 second**.

Brain Tumor Classification System:

Sept 2025 - Dec 2025

- Trained a medical imaging classifier on **45,000 MRI scans** using a **custom 4-stage CNN**, achieving **86% Success Rate** over **25+ epochs**. Identifies **four tumor types** in **~0.8s** at **128×128 resolution**, enhancing **diagnostic throughput** and reducing manual review by **~40%**.

Dynamic Team Creation Engine:

Jan 2026 – Feb 2026

- Designed a Django Team Creation System handling **60K+ records**, **2 roles**, and **3 workflows**, enabling **1–4 member teams** and processing **500+ allocations**, with **MySQL**, **email automation**, **admin analytics**, and **Docker deployment**.

Placement Portal:

Feb 2026 – Present

- Designed and developed an AI-driven Placement Platform featuring **2 dashboards**, **6 modules**, and **50+ REST endpoints**, supporting **300+ users** and **700+ sessions**. Implemented **resume parsing (800+ resumes)**, **skill mapping**, **job tracking (80+ listings)**, **coding & aptitude tests (40+ questions/test)**, and a **10-question voice interview pipeline**, using **Kafka** and **HDFS** for real-time processing, **AI-based evaluation (92% accuracy)**, and **automated PDF report generation**.

ACHIEVEMENTS & AWARDS

- Smart India Hackathon 2025 (National Level):** Presented an AI-driven civic solution that automated data classification and analytics for public services — shortlisted among the top 5% of innovative entries nationwide.
- HackZion V.1 – National Cybersecurity Hackathon:** Developed a phishing URL detection and spam-filtering platform using ML; ranked Top 10 out of 200+ teams for innovation and technical impact.
- Infosys Cohort 6 – Path to Pragati Program:** Selected among 1,000+ national applicants for Infosys Foundation's employability & innovation program focused on AI upskilling, leadership, and digital transformation.

TECHNICAL & AI CERTIFICATIONS

- Machine Learning & AI:** Explore ML Using Python (Infosys Springboard) | ML Foundation (Infosys Springboard) | Introduction to AI (Infosys Springboard)
- Data Science & Analytics:** Python Basics for Data Science (edX) | Data Analysis with Pandas & Python (Infosys Springboard)
- Springboard)
