PROFESSIONAL SUMMARY

Software Engineer Trainee aspirant with strong programming fundamentals and knowledge of Data Structures and Algorithms. Proficient in Python, Java, JavaScript, and C, with experience in Flask, Django, React.js, and REST APIs. Strong problem-solving skills, good communication, and ability to learn independently with exposure to modern development tools and practices.

EDUCATION

Sri Krishna Institute of Technology

Nov 2022 - Present

Bachelor of Engineering in Artificial Intelligence & Machine Learning

Bangalore

8.32 CGPA

Relevant Courses: Python, AI & ML, GenAI, NLP

Vidya Soudha PU College

Jul 2020 - Jun 2022

Pre-University College

Bangalore

Percentage: 79.32%

Stream: PCMB

SKILLS

- Programming: Python, Java, C/C++, JavaScript, Dart, SQL, HTML/CSS with strong coding fundamentals
- Backend & Frameworks: Django, Flask, React.js, REST APIs, basic .NET knowledge; experience building scalable web applications
- Systems & Concepts: Data Structures & Algorithms, OOPs, Debugging, SDLC, Agile, event-driven architecture (Apache Kafka, ZooKeeper)
- Tools & Infrastructure: Git, GitHub, VS Code, Docker, Docker Compose, Nginx, Gunicorn, MySQL, PostgreSQL, MongoDB, HDFS with strong problem-solving and communication skills

EXPERIENCE

AI Intern – Rubixe AI a brand of THINK AHEAD INNOVATIONS PVT. LTD. | 4 Months

Jan 2025 - Present

- Developed an AI-based Early Childhood Development System with a Flutter (Dart) mobile application and Django backend for analysis and insights, while working with technologies like Docker, AWS, and REST APIs.
- Built a dynamic team creation system as a Django-based web application for efficient grouping and collaboration, gaining hands-on experience in scalable development, deployment, and modern tools.

PROJECTS

Emotion Based Music Recommendation System:

Aug 2023 - Dec 2023

- Enhanced a real-time emotion interpreter using a **32,000-image dataset** and a **7-class CNN** running at **25–30 FPS**. Integrated it with a **500+ track library** across **7 genres** to deliver **emotion-based music suggestions** within **1 second**.

Diabetes Prediction System:

Sept 2023 - Oct 2023

- Engineered a **diagnostic predictor** trained on **70,000+ medical records** using **8 clinical metrics**, achieving **98% Detection Rate**. Delivered **sub-second Low/High-risk classifications**, **boosting early-screening productivity** by **35–40%** and **reducing manual effort** by **~60%**.

Spam Mail Detection System Using NLP & ML:

Aug 2024 - Sept 2024

- Built a **large-scale email filtering pipeline** on **100,000+ labeled messages** with **5,000–7,000 TF-IDF** and **embedding features**. Attained **98–99% Prediction Rate** using **SVM** and **Logistic Regression**, **classifying emails** in **0.3–0.5s** and **enhancing spamdetection efficiency** by **70–80%** while **reducing false positives** by **~40%**.

Brain Tumor Classification System:

Sept 2025 - Dec 2025

- Trained a **medical imaging classifier** on **45,000 MRI scans** using a **custom 4-stage CNN**, achieving **86% Success Rate** over **25+ epochs**. Identifies **four tumor types** in **~0.8s** at **128×128 resolution**, **enhancing diagnostic throughput** and **reducing manual review** by **~40%**.

ACHIEVEMENTS:

- **HackZion V.1 – National CyberSecurity Hackathon, AMC College:** Built a **24-hour security toolset** in a competition with **300+** participants and **50+** teams, fixing **10+ vulnerabilities** and **strengthening system resilience** by **~40%**.
- **Smart India Hackathon 2025 – Govt. of India:** Developed a **36-hour prototype** from a pool of **50,000+** teams across **70+** ministries, **optimizing workflow efficiency** by **35–40%**.

CERTIFICATIONS:

- **Machine Learning & AI:** Explore ML (Python), ML Foundations, Intro to AI Nov 2024 – Jan 2025
- **Data Science:** Data Science with Python, Data Analytics with Pandas, Intro to Data Science Oct 2024 – Feb 2025
