PROFESSIONAL SUMMARY

Software Engineer Trainee aspirant with strong programming fundamentals and knowledge of Data Structures and Algorithms. Proficient in Python, Java, JavaScript, and C, with experience in Flask, Django, React.js, and REST APIs. Strong problem-solving skills, good communication, and ability to learn independently with exposure to modern development tools and practices.

EDUCATION

Sri Krishna Institute of Technology

Bachelor of Engineering in Artificial Intelligence & Machine Learning

8.32 CGPA

Relevant Courses: Python, AI & ML, GenAI, NLP

Nov 2022 - Present

Bangalore

Vidya Soudha PU College

Pre-University College

Percentage: 79.32%

Stream: PCMB

Jul 2020 - Jun 2022

Bangalore

SKILLS

- **Programming:** Python, Java, C/C++, JavaScript, Dart, SQL, HTML, CSS
- **Frameworks:** Django, Flask, React.js, Flutter, REST APIs, .NET
- **Concepts:** DSA, OOP, Debugging, SDLC, Agile
- **Tools & Databases:** Git, GitHub, VS Code, Docker, Nginx, Gunicorn, MySQL, PostgreSQL, MongoDB

EXPERIENCE

AI Intern – Rubixe AI a brand of THINK AHEAD INNOVATIONS PVT. LTD. | 4 Months

Jan 2026 – Present

- Developed an AI-powered system using Flutter and Django, trained on 1,000+ data points, achieving 96–97.5% accuracy. Deployed using Docker and AWS, supporting 1,000+ users and integrating 10+ APIs, resulting in a 30% reduction in latency.
- Built a Django-based team creation system with 99.5% accuracy, reducing manual effort by 40%. The system supports 100+ users and efficiently processes 500+ allocations.
- Currently developing a feature-rich Placement Portal using Django, designed to support 500+ users with 15+ core functionalities.

PROJECTS

Emotion Based Music Recommendation System:

Aug 2023 - Dec 2023

- Enhanced a real-time emotion interpreter using a **32,000-image dataset** and a **7-class CNN** running at **25–30 FPS**. Integrated it with a **500+ track library** across **7 genres** to deliver **emotion-based music suggestions** within **1 second**.

Brain Tumor Classification System:

Sept 2025 - Dec 2025

- Trained a medical imaging classifier on **45,000 MRI scans** using a **custom 4-stage CNN**, achieving **86% Success Rate** over **25+ epochs**. Identifies four tumor types in **~0.8s** at **128×128 resolution**, enhancing diagnostic throughput and reducing manual review by **~40%**.

Dynamic Team Creation Engine:

Jan 2026 – Feb 2026

- Built a **Team Creation System** using **Django**, managing **60K+ records**, **2 roles**, **3 workflows**, and **1–4 member teams**, processing **500+ allocations** with **MySQL**, **email automation**, **admin analytics**, and **Docker deployment**.

Placement Portal:

Feb 2026 – Present

- Architecting an **AI Placement Platform** with **3 dashboards**, **7 modules**, and **68+ REST endpoints**, supporting **500+ users** and **1K+ sessions**; implementing **resume parsing (1K+ resumes)**, **skill mapping**, **job tracking (100+ listings)**, **aptitude & coding tests (50+ questions/test)**, and a **15-question voice interview pipeline**, leveraging **Kafka** and **HDFS** for **real-time processing**, with **AI evaluation (90%+ accuracy)** and **PDF report generation**.

ACHIEVEMENTS:

- **HackZion V.1 – National CyberSecurity Hackathon, AMC College:** Built a **24-hour** security toolset in a competition with **300+ participants** and **50+ teams**, fixing **10+ vulnerabilities** and **strengthening** system resilience by **~40%**.
- **Smart India Hackathon 2025 – Govt. of India:** Developed a **36-hour** prototype from a pool of **50,000+ teams** across **70+ ministries**, **optimizing** workflow efficiency by **35–40%**.

CERTIFICATIONS:

- **Machine Learning & AI:** Explore ML (Python), ML Foundations, Intro to AI Nov 2024 – Jan 2025
- **Data Science:** Data Science with Python, Data Analytics with Pandas, Intro to Data Science Oct 2024 – Feb 2025
